**NOTICE**  
**WELL WATER ARSENIC DISCLOSURE**

Tax Parcel No \_\_\_\_\_  
Section \_\_\_\_\_ Township \_\_\_\_\_ Range \_\_\_\_\_ Quarter Section \_\_\_\_\_

Legal Description( ) Attached( ) As follows: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

For the purpose of Snohomish Health District supplemental drinking water policies and procedures. The MCL for Arsenic shall be 0.010mg/1 (10 parts per billion [ppb]).

Arsenic concentrations in groundwater can vary over time.

There is variability in laboratory reporting.

While your drinking water meeets EPA’s standard for arsenic, it does contain low levels of arsenic. EPA’s standard balances the current understanding of arsenic’s possible health effects against the costs of removing arsenic from drinking water. EPA continues to research the health effects of low levels of arsenic which is a mineral known to cause cancer in humans at high concentrations and is linked to other health effects such as skin damage and circulatory problems.

The following arsenic level of \_\_\_\_\_ mg/l was detected on \_\_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_\_.
