R95

Notes

Age-adjustment was undertaken using the direct standardization method, based on the 2000 US population (11 age groups; <1, 1-4, 5-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74, 75-84, 85+). Infant mortality values were not adjusted for maternal age.
