

Snohomish County Influenza Surveillance Report

CDC Week 47 – ending 11/26/2022

SURVEILLANCE DATA:

Influenza-related hospitalization data comes from our partnerships with Providence Medical Center Everett and Swedish Edmonds. These data only include influenza-related hospital admissions for Snohomish County residents. Influenza hospitalizations are not a notifiable condition. Syndromic surveillance data is provided by the National Syndromic Surveillance Program – BioSense Platform. Influenza lab data comes from our partners at the Everett Clinic, Providence Medical Center Everett, and Swedish Edmonds. The Washington State Disease Reporting System (WDRS) is the data source for all influenza death data. Some data have been suppressed due to inaccuracies. Not all tables and graphs will have the same denominator. All data are preliminary and subject to change.

Table 1: Number of reported cases in Snohomish County for the 2022-2023 influenza season through CDC week 47 (ending 11/26/2022):

Hospitalizations	51
Influenza-related deaths*	3
Long-term care facility influenza outbreaks	1

* Deaths are all reported influenza-related deaths at the time of the report.

Figure 1: Number of influenza-related hospitalizations by CDC week of admit

Snohomish County Influenza Hospitalizations by Season: CDC Week 47 (ending 11/26/2022)

Snohomish County Influenza Surveillance Report

CDC Week 47 – ending 11/26/2022

Figure 2: Number of hospitalizations by age group

Table 2: Total number of reported influenza related deaths of Snohomish County residents by season:

Season	Number of deaths	Age range	Median age
2018-2019	26	<19-88	60
2019-2020	11	29-90	74
2020-2021	0		
2021-2022	1*		
2022-2023	3*		

*Age range and median age not reported due to small numbers.

Snohomish County Influenza Surveillance Report

CDC Week 47 – ending 11/26/2022

Table 3: Laboratory testing for influenza by sentinel Snohomish County healthcare facilities*:

CDC week (date ending)	Number of influenza tests performed	Number influenza A positive	Number influenza B positive	Percent influenza A/B positive
40 (10/8/2022)	485	3	1	0.8%
41 (10/15/2022)	570	4	0	0.7%
42 (10/22/2022)	552	16	1	3.1%
43 (10/29/2022)	652	41	3	6.7%
44 (11/5/2022)	906	118	2	13.2%
45 (11/12/2022)	1181	280	5	24.1%
46 (11/19/2022)	1992	699	16	35.9%
47 (11/26/2022)	2163	944	9	44.1%

*The following healthcare facilities work with the Snohomish Health District to provide influenza laboratory surveillance data: Everett Clinic, Providence Regional Medical Center Everett, and Swedish Edmonds.
