Spill Plan Template

[Business Name]

[Site Address]

[Phone Number]

In Case Of a Spill

Initial Actions

1. Assess the scene for safety hazards
2. Notify business manager / supervisor / safety officer
- 3. If situation is dangerous or an emergency, call 911**
4. Wear personal protective equipment
5. If safe, stop the flow and contain spill
6. Make required notifications
7. If safe and within capabilities, clean up spill
8. If necessary, contact a spill response contractor for additional resources

Waste contractors can be found at <http://www.ecy.wa.gov/programs/hwtr/hwsd/index.html>

Be ready to provide this information:

- Your name and phone number at your location
- Exact address of the spill
- What spilled and how much (pounds, gallons, number of containers)
- Date, time, cause and type of incident (fire, air release, spill, etc.)
- Concentration of the spilled material
- Where the spill went and what it contaminated (pavement, soil, drains, water bodies, public streets / sidewalks)
- Whether it's being contained and cleaned up
- Type and amount of petroleum stored on site, if any
- Facility and container characteristics (tanks, pipes, valves)
