

Weekly COVID-19 Graphs

June 5, 2022 – May 13, 2023

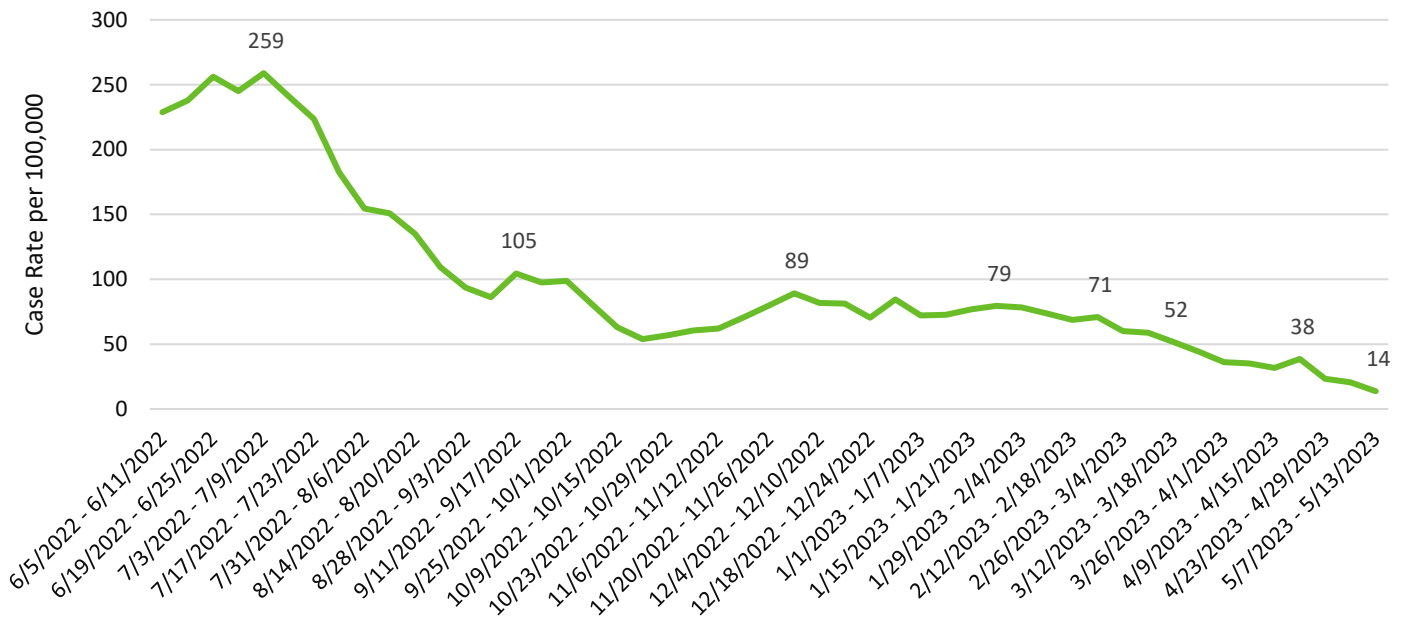

CASE DATA:

The Washington State Disease Reporting System (WDRS) is the data source for all case data. Some data have been suppressed due to inaccuracies. Not all tables and graphs will have the same denominator. All trend data are by symptom onset date or date of first positive COVID test. All data are preliminary and subject to change.

SNOHOMSH COUNTY SUMMARY:

- Snohomish County is currently in the low-risk transmission category.
- The Snohomish County COVID-19 case rate decreased this last week.
- COVID-19-related hospitalizations decreased to 1.7/100,000.
- COVID-19 transmission was <50/100,000 across all zip codes in Snohomish County.
- Case rates decreased amongst all age groups except for 80+ which was stable. Highest case-rates are amongst our 70+ population, which is due to higher rates of testing, and small population size.
- We saw decreases in cases week to week for all race/ethnicity groups except for Black/African American which saw a slight increase.
- There have been no cases associated with reported LTCF outbreaks in the past two weeks. There have been no new new LTCF outbreak for the past two weeks.
