To: All Onsite Wastewater Treatment System Designers
Subject: Sand Media Change

Dear Designers,

Effective immediately, Snohomish Health District will follow the RS&G(s) regarding the use of coarse sand media or ASTM C-33 sand. For current septic applications using coarse sand media, a redesign is NOT necessary to utilize ASTM C-33; however, please be sure to specify on the as-built what sand media is used.

If you have any questions regarding this change, please feel free to contact me at 425-339-8739 or apellham@snohd.org.

Thank you,

Andrea Pellham, R.S.
Environmental Health Supervisor
