

Requirements for Private Wells Overview

First - Get the Location of Your Well Approved

STEP 1

Submit an *Individual Water Supply Site Inspection* form to the Health Department. See the website listed below to access this form online.

STEP 2

Pay the application fee.

STEP 3

The Health Department will review your application. If approved, move on to the next set of steps!

Next - Follow Department of Ecology's Requirements

STEP 4

To drill the well, hire a licensed well driller and follow all Department of Ecology requirements. Once it is drilled, return to working with the Health Department for final steps.

Last - Get Your Well Accepted as a Drinking Water Supply

STEP 5

Submit a "Request for Review: Individual Water Supply" form with supporting documents to the Health Department. See the website listed below to access this form online.

STEP 6

The Health Department will review your form and supporting documents. If all looks good, it will be accepted. You're done! Remember to maintain and care for your well.
