Prevent Unwanted Access To Your Pool

IMPORTANT BARRIER REMINDERS

1. Gates must self-close and latch from all positions. Ensure nothing is propping the gate open.

2. Latches must be in good working order and be at least 60 inches high or continuously locked.

3. Barriers cannot have anything placed outside that can be used as a climbing feature (ex: chairs, trees, garbage cans).

For more information regarding pool safety requirements, please contact the Snohomish Health District at 425-339-5250.
