| Positive | N/A<sup>2</sup> | N/A<sup>2</sup> | X | Isolate at home until:  
  • Without fever for 24 hours<sup>3</sup>, AND  
  • Other symptoms improving, AND  
  • ≥10 days since onset of illness |
| N/A<sup>2</sup> | N/A<sup>2</sup> | X | Isolate at home until 10 days after positive test specimen was collected |
| Negative | X | X | Isolate at home until:  
  • Without fever for 24 hours<sup>3</sup>, AND  
  • Other symptoms improving, AND  
  • ≥10 days since onset of illness |
| X | X | Isolate at home until:  
  • Quarantine at home until 14 days after last exposure  
  • Re-test promptly if symptoms emerge |
| X | X | Isolate at home until:  
  • Without fever for 24 hours<sup>3</sup>, AND  
  • Other symptoms improving |
| X | X | No isolation or quarantine necessary |
| Not done<sup>4</sup> | X | | Preferred: get tested and re-classify based on results  
  Inferior alternative: isolate at home until:  
  • Without fever for 24 hours<sup>3</sup>, AND  
  • Other symptoms improving, AND  
  • ≥10 days since onset of illness |
| X | X | COVID-19 exposure without symptoms  
  • Quarantine at home until 14 days after last exposure  
  • Pursue testing if symptoms emerge |
| X | X | Preferred: get tested and re-classify based on results  
  Inferior alternative: isolate at home until:  
  • Without fever for 24 hours<sup>3</sup>, AND  
  • Other symptoms improving, AND  
  • ≥10 days since onset of illness |
| X | X | No isolation or quarantine necessary  
  No testing necessary |

<sup>2</sup>Not applicable—does not impact disease control decision making.

<sup>3</sup>…without the use of fever reducing medications (e.g., acetaminophen, ibuprofen)

<sup>4</sup>COVID-19 testing is recommended (when available) for all contacts and all people with symptoms. If the personal health care provider is unwilling or unable to conduct testing, consider pursuing testing through SHD or another community-based testing venue (e.g., SeaMar, Community Health Centers, UW Medicine, other).
