This plan review guide is designed to help you through the plan review process for opening a new food service establishment in a new or existing building. You will find the following resources in this guide:

1. The 4-Step Plan Review Process
2. Minimum Equipment & Facility Requirements
3. Fee Schedule
4. Agency Resource List
The 4-Step Plan Review Process

Before you apply:

- Contact your local building and planning departments for additional requirements. (Common contacts are provided in the Agency Resource List included in this packet.)
- Inquire about any grease trap requirements.
- Obtain water and sewer/septic approval. If the facility will be connected to an on-site septic system, please visit the Snohomish County Health Department Septic Permits page.
- Review Minimum Requirements
- Make an appointment for a consultation (recommended)

For Mobiles: Contact Washington State Department of Motor Vehicles (DMV). All mobile food trucks or trailers must be currently licensed as a truck or trailer by the Washington State DMV. If a trailer is used, proof of ownership of a tow vehicle to move the trailer is also required.

For Mobiles: Contact Washington State Department of Labor & Industries (L&I). All mobile food trucks or trailers must pass inspection and be approved by the Washington State L&I for electric, structural, and mechanical correctness. Call 360.902.5221 to receive all necessary paperwork required for L&I approval.

Submit plans.
All items listed on the New Restaurant Plan Review Checklist, including the nonrefundable plan review fee must be submitted to Snohomish County Health Department. Applications will not be accepted unless all items on the checklist are complete and submitted together.

We accept applications in person Monday through Friday from 8 a.m. to 5 p.m. or by mail to: Snohomish County Health Department, Attn: Food Section Plan Review, 3020 Rucker Ave, Suite 104, Everett, WA 98201-3900.

Wait for approval letter.
Our goal is to send you a response letter within 30 days, informing you that either that the project is approved and meets state and local codes, or that additional information or changes are needed before approval can be given. A copy of the approval letter will be sent to all applicable agencies, such as the Building Department, Washington State Liquor Control Board, and Labor and Industries.

To avoid costly mistakes, do not purchase equipment or begin construction until you have Snohomish County Health Department written approval.

Pass inspection.
Once your project is complete, contact the Environmental Health Division to schedule a pre-operational inspection, which will allow the Snohomish County Health Department to verify that the establishment meets all state and local codes and matches the approved plans. For mobiles, the pre-operational inspection will take place at the Snohomish County Health Department.

Review the Pre-operational Checklist to see if you are ready for inspection. Schedule at least 7 days in advance. Charged reinspection may be necessary.

Pay for permit.
Once you have passed the pre-operational inspection, you will receive an invoice for the Annual Operating Permit. Use that invoice to pay the permit fee, and reinspection fees if applicable. A facility may be required to obtain multiple permits.

Once you have received approval from all other applicable agencies, such as local building inspection and/or fire marshal inspection, you are approved to operate your food business. Operating permits expire after 1 year.
Sinks

Handwashing sinks. Required in all food preparation, food service and warewashing areas.

- Handsinks must remain easily accessible, within the line of sight and 25 feet of all areas where food or beverages are handled, prepared, or served, and in warewashing areas.
- This may require more than one handsink per food service area. Handsinks must be equipped with mixing faucets or combination faucets, hand soap and paper towels.
- The minimum hot water temperature allowed at all handsinks is 100°F at the tap through a mixing valve. Ideally, the hot water should be 100-120°F. Self-closing or metering faucets shall provide a flow of water for at least 15 seconds.

3-compartment sinks. Required in all food service establishments, except for limited grocery stores where all items are pre-packaged. Drainboards should be provided on both sides with raised edges. Each compartment must have rounded corners and must be large enough to accommodate the largest utensil or equipment used in the establishment.

An automatic dishwasher does not replace the requirement for a 3-compartment sink.

Vegetable/fruit preparation sink. Required if there is rinsing, washing, or draining of canned fruit or vegetables. The sink must be stainless steel, have rounded corner basins, raised edges, indirectly plumbed with an air gap, and have at least one integral drainboard.

Meat preparation sink. Required if there is rinsing or thawing under running water of raw meat, poultry, or seafood. The sink must be stainless steel, have rounded corners, raised edges, indirectly plumbed with an air gap, and have at least one integral drainboard. Be aware that a double-basin prep sink cannot be used as both a vegetable and meat prep sink.

Dump sink. Required in bars or taverns near the 3-compartment sink or warewashing machine in the beverage service area. Dump sinks must be indirectly plumbed with an air gap. A handwash sink may not be used as a dump sink.

Mop sink. Required in all food service establishments. A mop sink (or service sink, curbed cleaning facility or janitorial sink) must provide hot and cold water and be equipped with a vacuum breaker if a hose will be attached to the faucet.

Restrooms

Employee restrooms. Employee restrooms are required. Employees may use the same restrooms provided to the public as long as they are located within 200 feet.

Public restrooms. Public restrooms are required with any on-premises consumption of food and beverages. Public restrooms must be conveniently located, available during all hours of operation, and accessible without going through areas of food preparation, food storage, or warewashing.
Refrigeration

Capacity & Cooling. The refrigeration requirements for storing and cooling foods is dependent on the menu and food preparation processes. Every restaurant is required to have a minimum of 2 stainless steel doors of commercial, upright refrigeration. Certain menus may require more refrigeration, as determined by the health department.

A walk-in refrigerator or blast chiller is required for any menus requiring cooling. An upright refrigerator is approximately 25 cubic feet. Prep refrigerators, glass door refrigerators, merchandiser refrigerators or freezers do not apply toward minimum refrigeration.

Prep (sandwich) refrigerator. Required if the menu includes make-to-order items, such as sandwiches, salads, hamburgers, or tacos.

Freezers. Freezers are optional, menu dependent, and do not take the place of the required minimum amount of food storage refrigeration.

Ventilation (hood system)

Ventilation must be adequate so that all areas are kept reasonably free from excessive heat, steam, condensation, vapors, fumes, or objectionable odors.

Exhaust hoods must be designed to prevent grease or condensate from dripping into the food and the filters or baffles must be readily removed for cleaning.

Contact the local building department for specifications and/or if a hood system is required for the type of food preparation activities that will occur on site.

Commercial Equipment

All equipment shall be listed by the National Sanitation Foundation (NSF) or equivalent for its intended use.
## Fee Schedule – Food Safety

**EFFECTIVE** November 9, 2022
